

# Welcome!

Hi there!

Thanks for purchasing my asset! Thanks to you I'll be able to provide updates, release more content and... *well...* survive!

**Please read this short page**, it contains some useful info you need.

## Quick Start

You can quickly learn how to use this plugin by visiting the multiple example scenes.

A short and simple documentation is also available, so you can learn everything in detail as well.

Please remember to write a review when you feel to, it takes a one minute but **it really helps. Thanks!**

## Documentation

**Online documentation:** <https://www.febucci.com/textanimator-docs>

I suggest referring to the online documentation, since it's always up to date, contains images, GIFs etc.

**Offline documentation:** you can find it inside the TextAnimator/Documentation folder.

Remember to export/unpack it outside your project's folder.

## Support

If you have any question about this plugin please contact me exclusively via email, so it'll be easier for me to organize everything: [support@febucci.com](mailto:support@febucci.com)

I'm always available for you and I'll be happy to help!

## Where to find me

As you see, I'm a human: you can drop an hi at any time!

I'd love to see the games you create with TextAnimator; **don't hesitate to let me know!**

It'll make me suuper happy (really) and I'd love to share them around.

You can find me and my content here (games, game dev tutorials and tips, ...):
